PROJECTS

1. Personal Portfolio Website

A responsive and interactive personal portfolio website showcasing academic achievements, certifications, and project work, built with modern design aesthetics and smooth animations.

2. AI Voice Assistant

A minimal viable product (MVP) designed to demonstrate core functionalities of a conversational AI assistant, with a focus on practical utility and implementation feasibility.

3. Data Structures and Algorithms

A collection of solved problems across arrays, strings, linked lists, and trees, emphasizing structured approaches to algorithmic problem-solving.
