PROFILE INFO

Aspiring Computer Science student with hands-on experience developing AI-based and full-stack applications using Python, Java, and JavaScript. Strong foundation in data structures, algorithms, and core CS principles, complemented by industry-recognized certifications. Actively build end-to-end projects and document technical work through GitHub and live demonstrations.

PROJECTS

NEXAGPT - INTELLIGENT AI ASSISTANT

A production-ready full-stack AI chatbot built with React and Node.js, featuring secure authentication, LLM integration, image generation, and a credit-based payment system.

🌐 <https://nexa-gpt-frontend.vercel.app/>

NEXAVOICE(JARVIS)- AI VOICE ASSISTANT

Jarvis is a smart and customizable desktop assistant built using Python, Eel, HTML/CSS, and JavaScript. It helps you control your PC and mobile with simple voice or typed commands.

PERSONAL PORTFOLIO WEBSITE

A responsive and interactive personal portfolio website showcasing academic achievements, certifications, and project work, built with modern design aesthetics and smooth animations.
